About MindPhair

MindPhair is the job fair for mathematics, physics and CSE students at ETH Zürich. Organised by a dedicated group of students, MindPhair aims to bring together the most interesting employers and young talents on the Swiss job market, helping students to take the first step and employers to find future experts right at the start of their career.
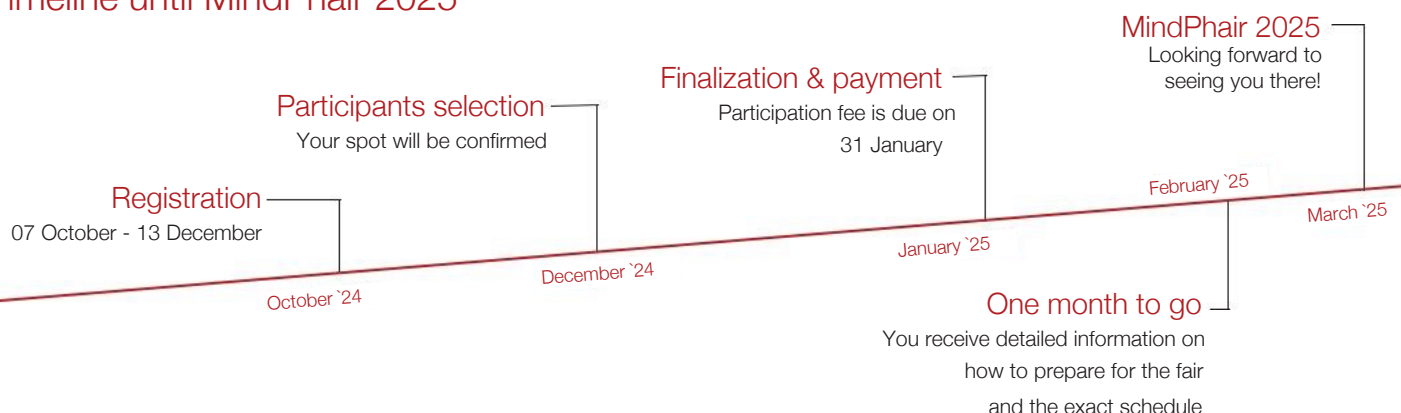

Our Offer

During this one day fair, students will be looking for internships, trainee programs, research opportunities, and of course direct employment positions. Our team will help your company reach up to 3000 students by advertising the job fair with posters around campus, on social media and ETH online spaces, in lectures at ETH and in the VMP newsletter. Additionally, we organise all infrastructure, help with possible side events so that you get to know students from a different perspective.

February `25

March `25

January `25

December `24

October `24

One month to go
You receive detailed information on
how to prepare for the fair
and the exact schedule

Booths

The MindPhair team will provide a rental booth placed in the main hall of ETH Zürich for all companies. We offer different booth size options. All booth areas are equipped with a power supply, WiFi, lighting, one bar table, and two chairs. Company-owned material (e.g. banners/rollups, cabinets, tables, chairs) may be used as well. Any equipment or materials brought by your company must abide by Swiss fire protection standards. You also have the preferred option of ordering printed walls and various furniture directly from the fair construction company to make your booth look even more appealing. More detailed information on this will follow after confirmation of your participation.
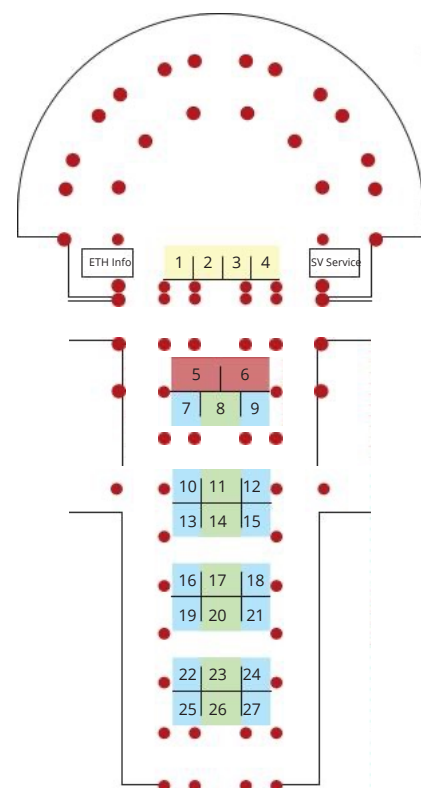

Talks & Side Events

In addition to the fair, we host a series of talks as well as various interactive side events. A talk or side event at MindPhair offers the perfect opportunity to provide a more detailed insight into the career options at your company. Possible side events include workshops, mock interviews, hackathons or a showcase of your work.

A booking for a talk includes the reservation of a lecture hall at ETH, wide advertisement to students, and – upon agreement – a small apéro/refreshments for the attendees. Each talk should ideally last around 45 minutes (to fit into the ETH time schedule).

If your company is interested in organising a talk or side event, our team will be happy to help you with the organisation and implementation.

Booth plan in ETH Main Building
(Location of single booths still subject to change)

Becoming a Main Sponsor

Two companies have the opportunities to become main sponsors. As a main sponsor, your company gets an extra-large booth and will be prominently advertised: your company logo will appear on our website, the front of our fair guide, as well as on all advertisements.
